2021-2022

World language courses develop essential global awareness and foundational target-language skills in reading, writing, listening and speaking. Level 3 classes are for students with Novice High language proficiency, or no prior target language instruction, will interact with, and in, the target language every class through a variety of scaffolded experiences with readings, oral stories, music, short partner exchanges, and more. Because learning to navigate multiple languages is only one component of becoming global citizens, students will study the many aspects of world cultures while using the target language. Through these explorations, focusing on growing language proficiency, and teacher supports, students can expect to move from Novice High to Intermediate Low proficiency level and expand their global awareness.

***Due to the COVID-19 pandemic** and the interrupted education experience of all DMPS students these scales for Year 3 Language Acquisition courses have been amended to reflect the new proficiency expectations based on hours of and gap of exposure to the target language. This in no way lowers the expectation nor rigor of these courses. It sets reasonable, reach-based proficiency expectations for students and teachers.*

World Language Mission and Vision

World language courses at DMPS exist to empower all students as global citizens who are both culturally and linguistically prepared to enter the next stages of life.

The world language program at DMPS strives to offer relevant, rigorous, and proficiency-based instruction to build students' abilities to communicate in an additional language. We acknowledge that all students can develop an additional language with appropriate support and coaching. We believe our world language courses help our students grow both academically and socially as community members. By focusing on what students can accomplish, we seek to build communicative skills and advance literacy development in the student's primary and additional languages.

Students should exit world language courses with the confidence to communicate effectively with others as their careers and education paths continue beyond their experiences in DMPS.

Adjusted Hours of Instruction due to COVID-19

Rationale for hours by school year and modality

Student contact hours by sequential year course for FY22. This assumes a regular schedule and consistent contact with students in FY22.

Year 1 FY22	
S1	60 hours
S2	60 hours
	120 hours Total

Year 2 FY22	
S1 modality shifts	45 hours
S2 modality shifts	45 hours
S3	60 hours
S4	60 hours
	210 hours Total

Year 3 FY22	
S1 pandemic adjusted	40 hours
S2 pandemic adjusted	10 hours
S3 modality shifts	45 hours
S4 modality shifts	45 hours
S5	60 hours
S6	60 hours
	260 hours Total

Year 4 FY22	
S1	60 hours
S2	60 hours
S3 pandemic adjusted	40 hours
S4 pandemic adjusted	10 hours
S5 modality shifts	45 hours
S6 modality shifts	45 hours
S7	60 hours
S8	60 hours
	380 hours Total

Standards-Referenced Grading Basics

Our purpose in collecting a body of evidence is to:

- Allow teachers to determine a defensible and credible topic score based on a representation of student learning over time.
- Clearly communicate where a student’s learning is based on a topic scale to inform instructional decisions and push student growth.
- Show student learning of Level 3 targets through multiple and varying points of data
- Provide opportunities for feedback between student and teacher.

Scoring

A collaborative scoring process is encouraged to align expectations of the scale to artifacts collected. Routine use of a collaborative planning and scoring protocol results in calibration and a collective understanding of evidence of mastery. Enough evidence should be collected to accurately represent a progression of student learning as measured by the topic scale. Teachers look at all available evidence to determine a topic score. All topic scores should be defensible and credible through a body of evidence.

Note: Only scores of 4, 3.5, 3, 2.5, 2, 1.5, 1, and 0 can be entered as Topic Scores.

Language acquisition focuses on developing communicative competency in an additional language. This focus on skill development makes these courses much more similar to a band or ceramics course than an English Language Arts course. Students new to language study develop their receptive skills (listening and reading) prior to being able to produce the language (speaking and writing). It also takes multiple years of practice to use the new language with accuracy. Because of this, Topic Scores are consistent throughout all years of study with proficiency level expectations adjusted based on the amount of time studied.

Multiple Opportunities

There are two forms of multiple opportunities; both require intentional planning by both the student and the teacher. One form is the opportunities planned by the teacher throughout the semester. The other form is reassessment of learning which happens after completing assessment of learning at the end of a unit or chunk of learning (see information in [SRG Handbook](#)). Students will be allowed multiple opportunities to demonstrate proficiency. Teachers need reliable pieces of evidence over time to be confident students have developed a skill set at a certain proficiency before deciding a final topic score.

Evidence shows the student can...	Topic Score
Demonstrate expected language abilities at the next proficiency level	4.0
Demonstrate all language abilities from Level 3 with partial success at the next proficiency level	3.5
Consistently demonstrate all expected language abilities at target proficiency level	3.0
Demonstrate expected language abilities with partial success at the target proficiency level	2.5
Demonstrate all expected language abilities of the previous proficiency level	2.0
Demonstrate expected language abilities of the previous proficiency level with scaffolds and inconsistencies	1.5
Demonstrate language abilities two levels below target proficiency level	1.0
Produce no evidence of language ability within two proficiency levels of the target	0
Level 3 target proficiency levels are indicated in World Language Course Guides. Target proficiency levels are research-informed by course and potential exposure time to the language per semester.	

Guiding Practices of Standards-Referenced Grading

1. Use a consistent 4-point grading scale.
2. Report student achievement and behavior separately.
3. Base scores on a body of evidence.
4. Achievement is organized by learning topic and converted to a grade at semester’s end.
5. Students have multiple opportunities to demonstrate proficiency.
6. Provide extension and support for learners.

ACTFL National Standards for Learning Languages- Communication

The ACTFL National Standards for Learning Languages - Communication standard and corresponding proficiency levels are the foundation to all world language curriculum and are aligned with the Common Core. The target proficiency for each world language course is adjusted by semester using potential instructional time with consideration of the difficulty of the world language in relationship to English. It is understood that the world language curricula content purposefully integrates the additional and essential National Standards for Learning Languages- Cultures, Connections, Comparisons, and Communities- and are also aligned with the Common Core. The Common Core-ELA focus is the “weave element” known as the “Language System” and evidenced in the adjusted proficiency levels in each content guide and thus is not listed on the CCSS alignment table below. Access to the full alignment by ACTFL [can be found here](#).

Topic Scores

Organizing Principles

Language acquisition is unique from core content areas. Core content areas often contain content-specific units of study that have focused outcomes and verb-oriented scales (e.g. ELA- Unit three- Argumentation: evaluating arguments and purpose). Additionally, some skills in core content areas are specific to a “level” based on the cognitive complexity. World language focuses on student skills and not teacher-centered prompts.

Language proficiency continues to build and no one proficiency indicator can be measured in isolation. The content of a language acquisition class should reflect the cultural uniqueness and perspectives of, and in, the target language. World language scales measure the student’s ability to navigate the language, independent of specific content instruction. Thus, the world language scales reflect the proficiency continuum with the level three being the research-informed proficiency level expectation by the end of the term.

All learners new to a language, regardless of age, start at a Novice Low proficiency. Students are provided with continuous comprehensible input of high frequency vocabulary to build communicative capacity. Any student with an existing linguistic system can develop and grow an additional language.

Topic scores in the World Language program are essential to the function and organization of a course and persist throughout the course and between levels. Topics are to be assessed using proficiency-based learning targets with unit-based instruction throughout the instructional period. All topics are reported, in equal weight and importance, in all terms. Proficiency indicators are updated based on hours of instruction and may change between semesters and school years due to scheduling considerations.

Topic Scores:

1. Listening
2. Reading
3. Writing
 - a. Interpersonal
 - b. Presentational
4. Speaking
 - a. Interpersonal
 - b. Presentational

Standard 1.1: Listening- Approaching Novice High Hours 140-210 (approx. Year 3 Semester 1)

ACTFL proficiency standards indicate student abilities when interacting with a listening prompt from an authentic source and have no previous preparation. It is known that students working with a teacher to acquire language in a comprehension-focused classroom would have a higher degree of accuracy when participating in the classroom environment than in unrehearsed interactions. Teachers should think about the classroom’s balance of performance (focused language acquisition and student response) with proficiency (unrehearsed interaction with an authentic audio) monitoring.

Note:
At Novice High, students should respond in the TL with scaffolds. *Spontaneous* speech will contain significant errors. The goal is fluency and communication. Accuracy comes later.

Multiple Opportunities & Understanding Proficiency

Writing at Novice proficiency often mimics early writing attempts in the student’s original language: spelling errors, short lists, sentences of three words, and lots of repetition. Students should focus on what they do know and how to rearrange those few words to create meaning. If students feel pressured to use an online translator to complete an assignment, the student is either trying to do too much or the expectation is too high for the proficiency level. Students should practice the current vocabulary and try to integrate new words into their writings. Students realistically need at least three writing samples with time and input in-between with teacher feedback cycles to demonstrate growth and proficiency.

Multiple Opportunities & Understanding Proficiency

Speaking at Novice proficiency often mimics early speaking attempts in the student’s original language: pronunciation errors, repeating sounds, difficult to understand, and choppy speech patterns. It is very normal that students cannot engage in genuine conversation and that a native speaker would struggle to understand a Novice student’s speech. Students should try to answer in Spanish when the opportunity presents itself. Students likely understand much more than they can produce at this time.

Multiple Opportunities & Understanding Proficiency	Additional Resources		
<p>Writing at Novice proficiency often mimics early writing attempts in the student’s original language: spelling errors, short lists, sentences of three words, and lots of repetition. Students should focus on what they do know and how to rearrange those few words to create meaning. If students feel pressured to use an online translator to complete an assignment, the student is either trying to do too much or the expectation is too high for the proficiency level. Students should practice the current vocabulary and try to integrate new words into their writings. Students realistically need at least three writing samples with time and input in-between with teacher feedback cycles to demonstrate growth and proficiency.</p>	<table> <tr> <td data-bbox="1276 1174 1564 1239">Paid Subscriptions El mundo en tus manos</td> <td data-bbox="1724 1174 1988 1336">Free Subscriptions LyricsTraining Quizlet Duolingo EdPuzzle</td> </tr> </table>	Paid Subscriptions El mundo en tus manos	Free Subscriptions LyricsTraining Quizlet Duolingo EdPuzzle

Multiple Opportunities & Understanding Proficiency

Speaking at Novice proficiency often mimics early speaking attempts in the student’s original language: pronunciation errors, repeating sounds, difficult to understand, and choppy speech patterns. It is very normal that students cannot engage in genuine conversation and that a native speaker would struggle to understand a Novice student’s speech. Students should try to answer in Spanish when the opportunity presents itself. Students likely understand much more than they can produce at this time.
